INTRODUCTION

The large-scale investments of the past half-decade are set to continue driving Qatar's health sector in the following years.

With a rapidly rising population and household incomes well above the developed-world average, public and private sector outlays are on track to keep rising alongside a state-led push to raise quality and expand services.

As the public sector enters a new cost-optimization phase in the wake of the oil price drop, the government is increasingly looking to the private sector

to fill areas of need, particularly those stemming from the rise of lifestyle-related diseases.

As a result, large medical companies have been approaching other entities in order to complement their range of products and expand their business activities.

In the midst of this market change, Sigma Medical aims to help larger companies complement their business by offering them state of the art technology and unique products.

MISSION & VISION

Mission:

As a medical company, we embrace the changing healthcare environment and seek to identify and explore opportunities as they emerge. With the best patient care always in mind, we insist on the utmost in quality of products, character of employees, and relationships with customers and colleagues.

We commit to strengthen our position as a market leader and a financially viable company through innovation and continuous improvement.

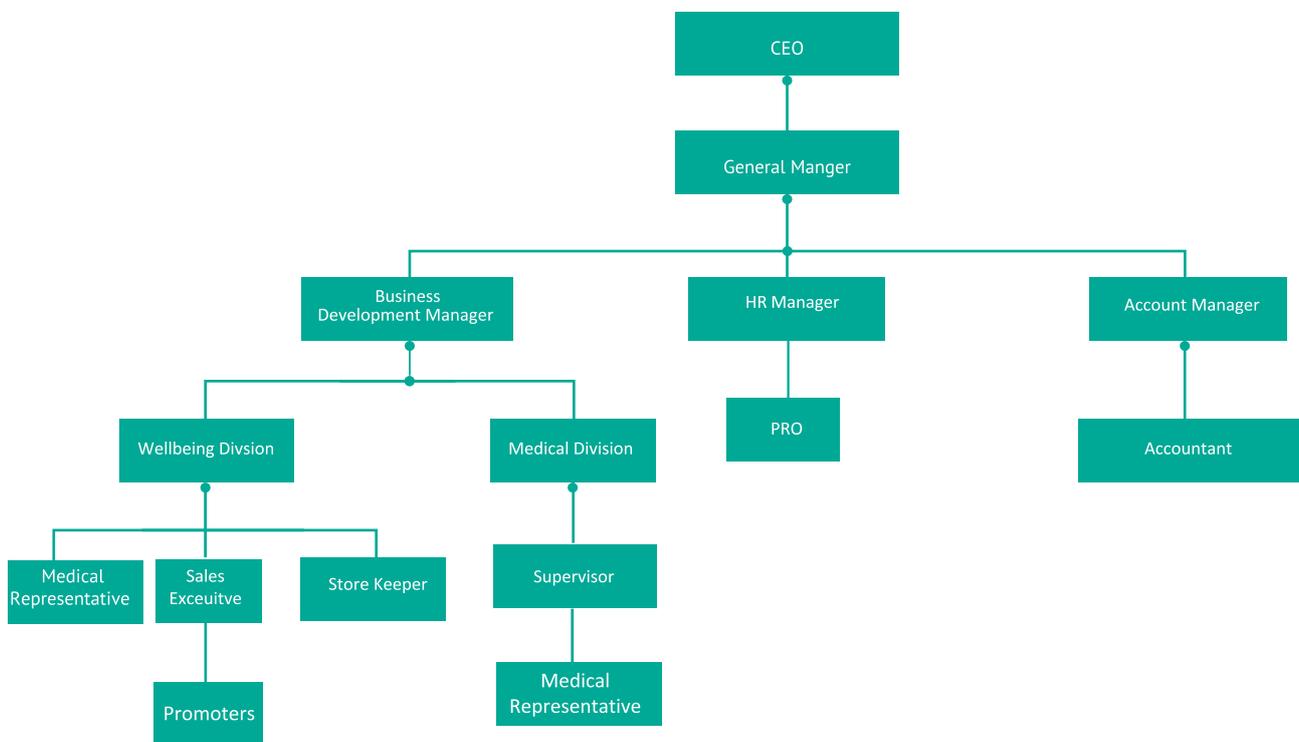

Vision:

At Sigma Medical Company we serve the medical society with more than just envisioning solutions. We endeavor to go the extra mile for our customers and stakeholders by providing them with high quality and affordable products.

VISION & MISSION

ORGANIZATION CHART

BACKGROUND

Sigma Medical Company was created based on the expertise, the experience and the new services needed to make health care in Qatar more accessible and affordable to all customers.

We are driven to ensure that every partner we serve receives the greatest possible value for their health care investment.

Sigma Medical has been established to bring its vision and mission to life through its experience in the Qatari Market specializing in marketing, distribution, consultation, product assessment and agency representation.

Sigma Medical consists of three different division which are **Wellbeing, Medical** and **Health Care**.

We believe in
having a healthy glowing skin
can boost one's confidence
in facing the challenges in life

moting hair growth and allowing the hair to maintain its natural luster.

Sigma Medical Company promotes and distributes hair treatments and medical shampoos to dermatology centers and pharmacies around the country.

NO1LIFT- EYE CREAM

Discover the secrets of celebrities and World stars. Forget cosmetic surgery. Revolutionary composition of No1Lift cream smooths your wrinkles within 3 minutes!

In addition, the skin around your eyes will be radiant and smoothed, bags under the eyes will be reduced. No1Lift lightens dark circles and the lines will be significantly smoother. Cream No1Lift acts against dehydration and keeps your skin refreshed for long time period. Green tea extracts and other ingredients soothes and protect

your skin from external environment.

Apply No1Lift cream every morning on clean and dry skin, a half of a pea-size amount on the wrinkles in the eye area and allow to dry. Within a few minutes you will notice the big difference. When No1Lift dries off, apply your day cream for easier make-up application.

The cream contains no parabens or other harmful substances. It has not been tested on animals.

NO1LIFT- EYE CREAM

How the cream works:

The cream ingredients bind silicon atoms with oxygen and create a network, which binds to the skin and directly effects the skin off. The skin is oxygenated and also detoxified.

The effect of the cream:

Thanks to the revolutionary ingredients No1Lift folds off the skin immediately, fills in the fine lines and whitens the skin. The effect of turning off wrinkles occurs after 2-3 minutes and lasts for a period of approximately 6 hours. Skin is hydrated

and protected against external influences, one of the ingredients, green tea, also acts as an antioxidant. The skin is velvety to the touch and you will have a feeling of lightness.

Usage:

Apply to the eye area the amount of half of a pea (dosage is individual) and rub it into the fine wrinkles. Let it dry and you will see immediately how the skin off and wrinkles disappear. For better make-up application apply a day cream as well. At night wash off the cream No1Lift with water or makeup remover.

MEDICAL DIVISION

The Medical division focuses on helping public and private hospitals satisfy their demands and requirements in regards to medical consumables and equipment as well as hospital design and management.

Sigma can also provide turnkey solutions

in terms of healthcare facilities (primary, secondary or tertiary) and specialty healthcare units.

We supply, install, test and commission medical devices and provide you with after sales services and maintenance.
